Office Action Summary		10/822,742	LI ET AL.		
		Examiner	Art Unit		
		BRIAN P. YENKE	2622		
	The MAILING DATE of this communication app	ears on the cover sheet with the c	orrespondence address		
Period for Reply A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION. - Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication. - If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication. - Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).					
Status					
 Responsive to communication(s) filed on <u>Amendment (8/29/07)</u>. This action is FINAL. This action is non-final. Since this application is in condition for allowance except for formal matters, prosecution as to the merits is closed in accordance with the practice under <i>Ex parte Quayle</i>, 1935 C.D. 11, 453 O.G. 213.

DETAILED ACTION

Response to Arguments

1. Applicant's arguments filed 29 August 2007 have been fully considered but they are not persuasive.

Applicant's Arguments

a) Applicant states that newly added limitation of "responsive to a luminance-mapping curve undulating about a point of inflection defined by a neutral point" is not disclosed by Graves.

Examiner's Response

a) The examiner disagrees. As shown in the figures of Graves, the user may include scopes such as a waveform monitor, vectorscope, luminosity histogram, or other graphs (para 0062). Graves also disclosecluedt the luminance graph include the use of midpoints (neutral points) in allowing the system/user to increase/decrease such points in order to make the picture darker/lighter. Thus in the broadest interpretation the user may adjust the mid range points (neutral) wherein the graph would curve//bend based around such point, wherein the graph as shown in 220 would fluctuate (undulate) around such generated graph.

Claim Rejections - 35 USC § 102

2. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

Application/Control Number:

10/822,742 Art Unit: 2622

Claims 11-20 are rejected under 35 U.S.C. 102(e) as being anticipated by Graves et al., US 2003/0103057.

In considering claims 11-13, 16 and 19-20,

- a) the claimed obtaining intensity... is met by color correction window 230 (Fig 2) which allows the user to select/alter/adjust luminance and chrominance values (the claimed variation) and intensity/hue (the claimed intensity).
- b) the claimed calculating average and variance...is met where the system computes the mid's and differences of the selected luminance/chrominance value and the luminance/chrominance value of the other pixel.
- c) the claimed calculating luminance-contrast adjustment...is met where the system includes "auto-contrast buttons" (para 87, 88, Fig 4).
- d-e) the claimed constructing...is met where the system constructs a representation of the colorspace whether cylindrically or graphically.
- f) the claimed applying...is met where the selected points on the curve/position of the luma and chroma selected are applied to the video signal to map the original pixels.

In considering claims 14 and 17,

Graves discloses the use of LUT's (para 110).

In considering claim 18,

As stated above with respect to claim 11, Graves discloses the use of a cylindrical representation or tables.

Conclusion

3. **THIS ACTION IS MADE FINAL.** Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date

Application/Control Number:

10/822,742

Art Unit: 2622

Page 4

of this final action and the advisory action is not mailed until after the end of the THREE-MONTH

shortened statutory period, then the shortened statutory period will expire on the date the advisory action

is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of

the advisory action. In no event, however, will the statutory period for reply expire later than SIX

MONTHS from the mailing date of this final action.

4. Any inquiry concerning this communication or earlier communications from the examiner should

be directed to Brian Yenke whose telephone number is (571)272-7359. The examiner work schedule is

Monday-Thursday, 0730-1830 hrs.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's Supervisor,

David L. Ometz, can be reached at (571)272-7593.

Any response to this action should be mailed to:

Commissioner of Patents and Trademarks

Washington, D.C. 20231

or faxed to:

(571)-273-8300

Any inquiry of a general nature or relating to the status of this application or proceeding should be

directed to the Technology Center 2600 Customer Service Office whose telephone number is

(703)305-HELP.

General information about patents, trademarks, products and services offered by the United States

Patent and Trademark Office (USPTO), and other related information is available by contacting the

USPTO's General Information Services Division at:

800-PTO-9199 or 703-308-HELP

(FAX) 703-305-7786

(TDD) 703-305-7785

10/822,742 Art Unit: 2622

An automated message system is available 7 days a week, 24 hours a day providing informational responses to frequently asked questions and the ability to order certain documents. Customer service representatives are available to answer questions, send materials or connect customers with other offices of the USPTO from 8:30 a.m. - 8:00p.m. EST/EDT, Monday-Friday excluding federal holidays.

For other technical patent information needs, the Patent Assistance Center can be reached through customer service representatives at the above numbers, Monday through Friday (except federal holidays) from 8:30 a.m. to 5:00 p.m. EST/EDT.

The Patent Electronic Business Center (EBC) allows USPTO customers to retrieve data, check the status of pending actions, and submit information and applications. The tools currently available in the Patent EBC are Patent Application Information Retrieval (PAIR) and the Electronic Filing System (EFS). PAIR (http://pair.uspto.gov) provides customers direct secure access to their own patent application status information, as well as to general patent information publicly available. EFS allows customers to electronically file patent application documents securely via the Internet. EFS is a system for submitting new utility patent applications and pre-grant publication submissions in electronic publication-ready form. EFS includes software to help customers prepare submissions in extensible Markup Language (XML) format and to assemble the various parts of the application as an electronic submission package. EFS also allows the submission of Computer Readable Format (CRF) sequence listings for pending biotechnology patent applications, which were filed in paper form.

16 November 2007
